SUMMARY

Final-year B.Tech student (EEE, AI/ML specialisation, CGPA: 9.3) with hands-on experience building AI-powered full-stack applications and deploying data-driven systems on Google Cloud. Skilled in Python, SQL, and machine learning, with practical exposure to GenAI tools including LangChain, Gemini API, and IBM watsonx.ai. Passionate about translating raw data into actionable business insight through analytical rigour and scalable solutions.

EDUCATION

Maharaja Agrasen Institute of Technology, Delhi

Aug 2023 – May 2027

B.Tech in Electrical and Electronics Engineering (AI/ML Specialisation) CGPA: 9.3 / 10.0

SKILLS

Languages: Python, SQL, JavaScript (ES6+), C++

Data & ML: Pandas, NumPy, Matplotlib, Scikit-learn, Statistics, Model Evaluation, Deep Learning

Generative AI & LLMs: Gemini API, LangChain, Google Agent Development Kit (ADK), Vertex AI, IBM watsonx.ai

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, React.js, Next.js

Cloud & Tools: Google Cloud Platform (GCP) - Cloud Run, Vertex AI, Firestore · Docker · Git · Firebase

RELEVANT PROJECTS

Stratify | Python, Google ADK, Gemini 2.5 Flash, FastAPI, Firestore, Cloud Run

2026

github.com/Rex123-hash/agent-war-room · Google Cloud Gen AI Academy APAC 2026 – Cohort 1

- Improved operational visibility for project leads by building a multi-agent AI operations dashboard on Google ADK — specialized agents autonomously perform risk analysis, blocker detection, multi-dimensional scoring, and executive briefing generation using statistical aggregation and LLM reasoning.
- Processed and interpreted structured operational datasets in real time; translated raw project data into prioritized, actionable decision reports — demonstrating the raw-data-to-insight-to-recommendation workflow central to DS consulting.
- Deployed separate FastAPI backend and Streamlit frontend on Google Cloud Run with Firestore-backed audit logging and autonomous health-check workflows.

SportsGuard AI | Python, React, Node.js, Gemini 2.5 Flash, Vertex AI, Cloud Run

2026

github.com/Rex123-hash/sports-guard-ai · Google Solution Challenge 2026 — Top 106 of 85,000+ registrations & 6,700+ submissions

- Reduced piracy verification time from hours to seconds by architecting a 64-bit dHash + Hamming-distance detection pipeline for multimedia data — applying signal processing and statistical similarity methods to a real business enforcement problem.
- Integrated multimodal AI adjudication via Gemini 2.5 Flash with a weighted composite scoring model ($0.4 \times \text{dHash} + 0.6 \times \text{Gemini}$), generating structured evidence reports and automated DMCA notices on Google Cloud Run.

CodeCompass | Python, FastAPI, IBM watsonx.ai, Granite 3, Docker, IBM Cloud

2026

github.com/Rex123-hash/codecompass · IBM Bob Dev Day Hackathon 2026

- A repository intelligence platform that parses any GitHub codebase and routes structured context to IBM watsonx.ai Granite 3 — generating architecture analysis, onboarding roadmaps, and a 5-dimensional weighted quality score (structure, tests, documentation, DevOps, security).
- Demonstrated rapid interpretation of complex existing codebases; deployed on IBM Cloud Code Engine via Docker with pytest test coverage across API endpoints and data transformation logic.

WORK EXPERIENCE

Summer Intern — Electrical & Data Analysis

Jun 2025 – Jul 2025

Tata Power Delhi Distribution Limited (TPDDL) · Delhi

- Analysed metering and grid reliability data across 7+ distribution zones (2M+ consumers) using Python and Excel; identified outage patterns and anomalies through statistical data analysis and produced a quantitative AT&C loss report with operational improvement recommendations.

NOTABLE ACHIEVEMENTS & CERTIFICATIONS

- Academic Excellence- University Rank 3, College Rank 2 with a 9.43 CGPA; consistently top-performing across mathematics, statistics, ML, and data analysis subjects.
- Research Paper Submission - Primary Author "Sensor-Economical Tamper Detection in Smart Energy Meters" (Paper ID 396); submitted to WinTechCon 2026 (IEEE). Results expected September 2026; presentation scheduled November 2026.
- Google Solution Challenge 2026 - selected in Top 106 out of 85,000+ registrations and 6,700+ prototype submissions (India); SportsGuard AI advanced to Round 2.
- Google Cloud Gen AI Academy APAC 2026 - Cohort 1 - Certificate of Completion (Apr 2026); built and deployed Stratify with MCP integration on Cloud Run.
- IBM Bob Dev Day Hackathon 2026 - deployed CodeCompass, an AI repository intelligence platform powered by IBM watsonx.ai Granite 3 on IBM Cloud Code Engine.
- NCC 'C' Certificate, Corporal & Discipline In-Charge - demonstrates leadership, accountability, and disciplined execution in team environments.
